

Intrix Payment Gateway

Safe, Reliable & Certified Application Software

The Intrix Payment Gateway is the newest, most powerful, and flexible electronic payment solution from Intrix. It incorporates many features that are designed to provide constant and reliable payment processing services for your business. From its inception, it was designed with data security as the central pillar of its design. The Intrix Payment Gateway is a complete, Software as a Service (SaaS) solution that can be licensed and has both a PA-DSS and PCI Service Provider Level 1 certification.

Ease of Integration for Developers

The robust Web Services API allows developers of all skill levels to quickly integrate their applications. The API wrappers allow developers to work with familiar tools such as Java, PHP, .NET, or SOAP services. The inline frames architecture allows developers to isolate themselves from PA-DSS requirements whether they are developing a simple web page or sophisticated business application.
