

# Intrix Recurring Payments

## Recurring Module; Subscription, Membership & Card On File

The recurring module is an additional module for users of the Intrix payment gateway that's perfect for merchants that bill for subscriptions, memberships or for those choosing to store a "card on file" for their existing customers. The recurring module supports any combination of rate plans and subscription periods and the remote storage of card sensitive data facilitates PCI compliance.

**Shipping Information**  
 First Name:  Last Name:  Company:   
 Address:  City:  State:   
 Country:  Postal Code:  EMail Address:

## Customer Database Management

Using the recurring payments module, merchants can manage the billing database by establishing customer payment profiles. The payment profiles can be billed weekly, bi-monthly, monthly, quarterly or annually. In addition, payment profiles can be billed on a user defined subscription basis.

**Scheduler Information**

Amount:

Charge the Customer Every  Days

Select Plan:   Charge the Customer On The  Of Every Month

Start Date:   Charge the Customer  Times
